

The diagram illustrates the cellular context of the ISG15 antiviral mechanism. It features three nested rectangular frames. The outermost frame is light pink with rounded corners and an orange border. Inside it is a white rectangle with rounded corners and an orange border. The innermost frame is a light green rectangle with sharp corners and a black border. Centered within the green frame is a white rectangle with sharp corners and a black border containing the text 'ISG15 antiviral mechanism'. The word 'cell' is positioned in the white area between the green and orange frames on the right side.
