

The diagram illustrates two metabolic phases occurring within the cytosol. It features a large light orange rounded rectangle representing the cytosol. Inside, there are two green rounded rectangles. The first green rectangle on the left contains a white box with the text 'Phase 1 - Functionalization of compounds'. An arrow points from this box to a second green rectangle on the right, which contains a white box with the text 'Phase II conjugation'. The word 'cytosol' is written in the bottom left corner of the orange rectangle.

Phase 1 –  
Functionalization of  
compounds

Phase II  
conjugation
